PURE

DEPENDABLE

HIGH QUALITY

CERTIFIED SENECA WHEAT (Treated)

Seneca is an excellent variety of outstanding performance. It is a medium tall, beardless, stiff straw, excellent standability, shows good resistance to disease. Tests show a substantial increase in yield over Thorne. It carries a higher test weight per bushel than most varieties and has Excellent milling quality. It matures one to three days later than Thorne, and is fast replacing that variety. You will not want to over-look this outstanding variety. Sow 1½ bushels per acre, two bushels on sandy soils.

CERTIFIED PENNOLL WHEAT (Treated)

One of the newer varieties. Tall with very stiff straw, beardless. Produces high yields of both grain and straw. Considered one of the highest yielders in Pennsylvania. Sow 1½ bushels per acre; 2 bushels per acre on sandy soils.

CERTIFIED DUAL WHEAT (Treated)

This variety is outstanding for its resistance to Hessian fly. For this reason can be sowed early, and pastured this fall and still come through with an excellent yield of good quality grain. In many cases Dual has outyielded other standard varieties of wheat here in Pennsylvania. This is a beardless variety with fairly stiff straw of medium length. Sow 1½ bushels per acre; 2 bushels per acre on sandy soils.

CERTIFIED WONG BARLEY (Treated)

The most popular variety of winter barley. Beardless stiff straw—good variety for combining. Keep feed costs down by producing more of your own feed. Barley can be substituted for part corn in your feeding program. Sow 2 bushels per acre.

CERTIFIED HUDSON BARLEY (Treated) (Bearded)

This is one of the most promising varieties of winter barley. This variety originated in New York state. Hudson is superior in winter hardiness, disease resistance, and yield. It has stiffness of straw which gives it good standability. The grain carries a very high weight test. Sow 2 bushels per acre.

DU BOIS WINTER OATS (Treated)

This is one of the newer varieties. Stiff straw, medium height. Excellent yielder of good quality grain. One of the most winter hardy varieties of winter oats. Shows good resistance to disease. Recommended best for south-eastern Pennsylvania, Maryland, Delaware, and New Jersey. Sow 2½ bushels per acre.

BALBO RYE (Pasture type)

This variety is recommended mainly for pasture. Produces earlier spring pasture than other varieties. Sow 2 bushels per acre.

TETRA PETKUS RYE

A superior type rye that produces a very high yield of large plump kernels. In many cases the yield of Tetra Petkus is nearly twice that of ordinary rye. Produces excellent pasture and can also be used for silage. Sow 2 bushels per acre.

ALFALFA

Certified Du Puits, High yielding, good stand establishment, winter hardy, longer growing period.

Certified Vernal. Wilt resistant, winter hardy, high yield, fine stem, dark green color.

Certified Ranger. Popular variety, wilt resistant, good yielder, winter hardy.

Certified Buffalo. Wilt resistant, good yielder, not as winter hardy as above varieties.

TIMOTHY

Our Timothy tests 99.60% pure or better, and is low in weed contents. There is a fair crop of Timothy this year. Prices are considerably lower than a year ago. Order your Timothy along with your order for seed grains. We pay freight on orders of 200 lbs. or more.

PASTURE MIXTURE AND GRASSES

September is an excellent time to start permanent pasture. Due to more moisture and cooler weather during this time grasses do not burn out as readily while in the seedling stage. Many of the voluntary weeds that come up are frozen out before the grasses can be choked. Our permanent pasture mixture contains Timothy, Kentucky 31 Fescue, Perennial Rye, Grass, Red Clover, Kentucky Blue Grass, Red Top, and Ladino Clover. Sow 20 pounds per acre.

GRAZERS—DELIGHT PERMANENT PASTURE

This is a highly tested formula of permanent pasture. Containing a large variety of valuable grasses and legumes, including Lincoln Brome grass, S-37 Orchard, Ladino Clover, Perennial Rye grass, Meadow Fescue, White Clover and Birdsfoot Trefoil, etc. Under ordinary conditions will furnish pasture from early spring to late fall. Sow 35 lbs. per acre. State if wanted for high land or low land. Packed only in 35 lb. bags.
